Who We Are.

Established in 2005 by Andy and Samantha Grigg, Prestige Universal Mining Pumps (P.U.M.P.) is the premier manufacturer and supplier of mining pumps in Australia.

Our high-quality products and outstanding customer service have made us well-known throughout the mining industry as a trusted partner for new pump supply, pump hire, maintenance, repairs, and motor rewind services.

Mining pumps are an integral part of any mine, as they prevent the occurrence of flooding. With our local knowledge, we have an in-depth understanding of mining and geographical conditions, which equips us to deal with any mining scenario. Our team's vast experience enables us to quickly and efficiently recommend the ideal solution for your needs.

Throughout the years, our team has focused on further improving our already high-quality **Australian Made** products for increased durability and a longer service life. We spend significant time on research and development to improve quality, reliability, and resistance to impact damage and corrosion.

We are continually working to improve our products and services to provide you with the most ideal solution for all your pumping needs. Our aim is to offer the best advice, products, service, and price in Australia.

What We Do.

P.U.M.P. manufactures and supplies our own range of high-quality **Force** pumps designed specifically for Australian conditions. Hand built in Australia, our **Force** pumps are completely compatible with the Flygt® BIBO range of pumps and come with performance reports from our in-house test facility, which show up to **50% cost savings** compared with some of our competitors.

In addition to new pump sales, we also offer hire pumps and complete maintenance, servicing, and repair for all types of pumps. Our licensed mechanical and electrical fitters provide on-site pump repairs and servicing Australia-wide. For your peace of mind, every pump we service or repair must pass a full test procedure and meet specification requirements before being sent back to site.

We also supply pumps and parts from the world's leading manufacturers of centrifugal pumps, air operated diaphragm pumps, and submersible pumps, including Davey, Grundfos, Lowara, and Pumps 2000, to name a few.

- ▼ Hire pump supply
- ▼ New pump supply
(100% our product)
- ▼ Pumps and replacement parts
from leading pump manufacturers
- ▼ Maintenance, servicing, and
repairs for all pump types
(including motor rewinding)

The P.U.M.P. Difference.

With over 45 years' experience in mining, our founders Andy and Sam Grigg, are no strangers to the industry.

They saw a gap in the market where mining pump suppliers and repairers were consistently charging high prices for products and services lacking in quality and reliability. Our high-quality products, excellent customer service, and specialist experience in pump sales and maintenance set us apart from other mining pump supply companies.

Whether you are a project manager, electrical supervisor, or purchasing officer, we aim to provide the best possible prices and service, outlining your options in language you will understand. Our professional, experienced team is transparent, open, and honest in all our dealings with you. We are proud of the reputation we have developed for client-first service across the mining sector.

The real beauty of what we offer is that our parts are universal and interchangeable – hence Prestige Universal Mining Pumps. It's all part of the P.U.M.P. difference.

Vast knowledge and experience

High level of communication

Honesty and transparency

Fast, reliable turnaround

Quality and value

Why Choose Us?

P.U.M.P. is the preferred supplier of pumps and pump repairs for much of the mining industry, with our low costs, outstanding reliability, and excellent service. We have consistently proven we can provide savings of **50% across the board** for service and supply of parts and pumps for underground and surface dewatering. In recognition of this, we have been awarded contracts for numerous mining sites, many of which have been renewed several times since commencement.

We are proud suppliers of pumping equipment, parts, and repairs for sites including, but not limited to:

- ▼ Silver Lake Maxwells Operation
- ▼ BHP South32 (a branch of BHP)
- ▼ Northern Star Rubicon
- ▼ McMahon's Tropicana
- ▼ Round Oak Jaguar
- ▼ Barminto
- ▼ KCGM

Total control of our product manufacturing enables greater quality control and lower costs, which we pass on to you. We are the only true manufacturer of the **Force 15** (Snort Pump) and the only pump company offering in-house rewinding and servicing for electrical motors up to 400kw. We also service vent fans, agitators, and dual voltage stators, upon request.

Despite our ongoing research and development, our prices have remained the same since 2018. In fact, continual refinement of our products and manufacturing processes enables us to produce better quality, higher strength components with increased durability and service life at no additional cost. This is testament to our commitment of offering high-quality **Australian Made** products with excellent value for money.

Accreditations.

P.U.M.P. is proud to be officially recognised as part of the **Australian Made** Campaign established by the Australian Chamber of Commerce & Industry, in cooperation with the Federal Government. We are also a certified **Australian Owned** business, which means your money stays in Australia, where it belongs.

These accreditations communicate our great pride in being owned by Australians, with our products manufactured right here in Australia. This not only helps support the local economy, but also provides you with assurance as to the quality and reliability of our products and services.

Community Support.

P.U.M.P. believes in giving back to the community that supports us and we are a proud supporter of community groups and sporting clubs, including:

- ▼ Goldfields Children Charity Ball
- ▼ Kalgoorlie Dog Adoptions Inc.
- ▼ Eastern Goldfields Kart Club
- ▼ Hibernians Cricket Club
- ▼ Pacific MMA Kalgoorlie
- ▼ Give Me 5 for Kids Charity
- ▼ Cougars Netball Club
- ▼ Wilderness Society
- ▼ Nullarbor Muster
- ▼ CareFlight

Testimonials.

At Prestige Universal Mining Pumps, we always encourage our customers to provide honest feedback about our service and the quality of our products. Here is what some of our customers have to say about us...

“PUMP provided great response time and good communication. I found this much better than the backhanded service we were getting from our other supplier. PUMPs products are also being continually developed and upgraded. I have dealt with a range of different mine dewatering pumps and pump suppliers and I personally prefer PUMP for its superior service and quality.

Store Supervisor, Dugald River Mine

“Prestige Universal Mining Pumps... consistently meet or exceed our requirements in regard to performance and we also find that we are gaining extended life from our pumps. The response to problems in or out of hours is quick and decisive. I would recommend PUMP to any organisation requiring dewatering requirements.

Financial Controller, Central Norseman Gold Corporation Ltd

“Can you please pass on my thanks for all the help your team did in helping us out with the urgent request in repairs to the 75kW motor last week. Much to their help, we were able to get the Jumbo operational again in a very quick time. Your support this year has been fantastic.

Electrical and Fixed Plant Supervisor, KCGM

“I am pleased to say that PUMP's quality of parts and service, including out of hours, has equalled or surpassed my expectations. We have found that we are getting a better life from our components, an increased pressure and reduced rework. I would recommend PUMP and Andy Grigg to any organisation requiring underground pumping requirements.

Underground Electrical Supervisor, Barrick Lawlers
– New Holland

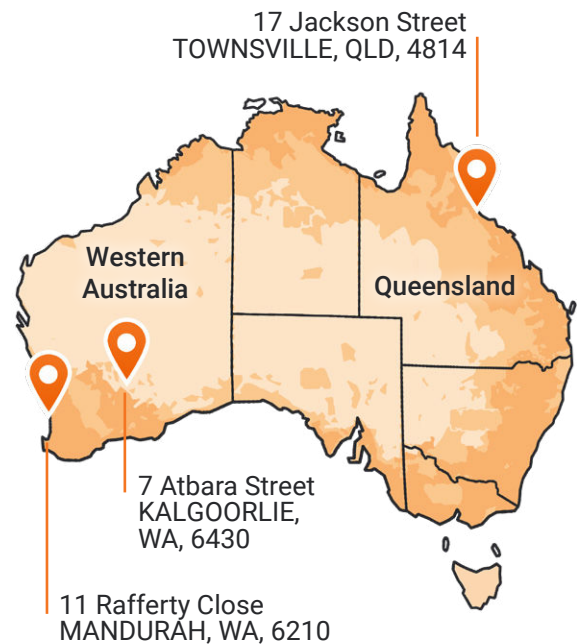

“From the time I arrived at Pump I felt that I was going to be looked after - there was someone at the front desk, which meant I did not have to look in workshops, stores and the like to find someone to offer assistance. I could not believe it - service that I had not experienced in a very long time. Both of the issues I had brought to Pump were dealt with quickly, efficiently, and to my absolute satisfaction.

Director, Explosives Manufacturing Services

Contact.
